

VM SERIES 1000-1300 MM

The DENSO VM-Series six-axis articulated robots offer exceptionally long reaches along with high speed, high precision and a large payload capacity. The VM-Series robots offer the following outstanding features:

- Fast cycle times from 0.95 to 0.89 sec.
- Payloads up to 10 kg
- Reaches from 1,000 mm to 1,300 mm
- High maximum allowable moment of inertia
- Compact design saves floor space, facilitates integration
- Floor- or ceiling-mount, with no special hardware required
- Operation in dusty and wet environments (optional IP65 configuration)
- Operation in cleanrooms (optional cleanroom class-100 configuration)
- ANSI and CE compliance allows global deployment
